

Supplier invoice-price check: sample report

Example Distributor (synthetic) | Supplier A (synthetic) | Invoices dated 1 July to 28 September 2026 | Report IPC-981A9EFA35

WHAT WAS CHECKED

Partial coverage: 11 of 17 invoice lines compared (64.7%), \$7,183.01 of \$8,102.51 invoiced (88.6%).

4 lines were outside the scope of the check and 2 could not be compared. Each is listed with its reason below and in the spreadsheet.

\$302.00

4 potential billing exceptions, after matched credits

1

difference fully offset by a credit (\$50.00)

\$5.00

1 line invoiced below the agreed price (listed, not netted)

THE THREE EXAMPLE CASES FROM THE OFFER

Case	What the files showed	Result
100 units invoiced at \$10.50; agreed price \$10.00	Invoice INV-5001 line 1 (invoice file row 2); price schedule row 2	\$50.00 potential difference (EX-001)
Invoice in cases; price schedule in single units	Invoice INV-5001 line 2 (row 3): 4 CS at \$63.00. The schedule prices this SKU per EA and no pack size was supplied.	Unresolved until the pack size is confirmed. Not counted.
\$50 difference with a matching \$50 credit	Invoice INV-5002 line 1 (row 6): 50 EA at \$12.00, agreed \$11.00. Credit CM-901 (credit file row 2) for \$50.00.	\$0.00 remaining difference

POTENTIAL BILLING EXCEPTIONS

ID	Invoice	SKU	Calculation (with source rows)	Amount
EX-001	INV-5001 row 2	SYN-1001	Invoiced 100 EA x \$10.50 = \$1,050.00. Agreed 100 EA x \$10.00 (price schedule row 2) = \$1,000.00. Difference \$50.00.	\$50.00
EX-002	INV-5002 row 7	SYN-4004	Invoiced 30 EA x \$8.40 = \$252.00. Agreed 30 EA x \$8.00 (price schedule row 5) = \$240.00. Difference \$12.00.	\$12.00
EX-003	INV-5003 row 9	SYN-5005	Invoiced 150 EA x \$20.00 = \$3,000.00. Agreed 150 EA x \$18.50 (price schedule row 8) = \$2,775.00. Difference \$225.00.	\$225.00
EX-004	INV-5005 row 15	SYN-7007	Invoiced 100 EA x \$3.25 = \$325.00. Agreed 100 EA x \$3.10 (price schedule row 10) = \$310.00. Difference \$15.00.	\$15.00

LINES NOT CHECKED, AND WHY

Reason	Lines	Category
Freight or delivery charge (outside the price check)	1	Excluded from scope
Fuel surcharge (outside the price check)	1	Excluded from scope
Outside the check period	1	Excluded from scope
Possible duplicate line	1	Excluded from scope
SKU not in price schedule	1	Could not compare
Unit of measure differs; pack size not supplied	1	Could not compare

ALSO IN THE SPREADSHEET

One line (INV-5005, row 17) was invoiced \$5.00 below the agreed price. It is listed in the spreadsheet and is not subtracted from the exceptions. Credit CM-902 (\$12.50) was recorded as a freight credit, so it was not set against any price difference. Rows 13 and 14 were identical lines on invoice INV-5004. The line was compared once and the copy is listed for you to ask about.

The workbook has a sheet for each of these: exceptions, other differences, lines not compared, credits, duplicate checks, every line received, and the rules used.

A potential billing exception is a line where the net price charged, after line discounts and the price credits that could be matched to it, is above the agreed price in the price schedule supplied. Differences inside a small rounding allowance (at most one cent per unit, and less for low-priced items) count as a match. It is not a confirmed overcharge or an amount owed. You decide which items to raise with your supplier. SYNTHETIC EXAMPLE: every name, SKU and price on this page is invented.
